INDEX TO VOLUME 6

This index covers only the major papers, their authors, and principal headings. It does not include the abstracts. For the latter there are separate indices to authors on pages 365-367 and 617-620. If one wishes to locate an abstract, author unknown, or search for a subject, the synopses of programs on pages 273-274 and 469-470 will prove useful in locating appropriate sections of the program. Titles and authors, pages 275-294 and 471-502, will then lead to the abstract desired. Minutes of business meetings, officers, and reports are entered only under *American Society of Zoologists.*

Abstracts, see note above.
  index of authors, annual December meeting, 617-620.
  index of authors, August meeting, 365-367.
  of annual December meeting, 503-616.
  of August meeting, 295-364.
Aggression, competition as a cause of, 696.
  conditioning, 653.
  effects of age, 650.
  effects of castration, 650.
  extinction as an elicitor, 648.
  heat, cold, and noise as elicitors, 648.
  in cats, 666.
  in fish, 629.
  in humans, 659.
  in monkeys, 654, 666, 669.
  in rats and mice, 643, 683.
  interspecies, 651.
  intra-cranial stimulation as an elicitor, 648, 663.
  pain as a cause of, 643, 685, 689.
  social disorganization as a cause, 697.
  symposium on experimental analysis of, 627.
  tests of, 685.
  toward inanimate objects, 652.
Aggressive behavior evoked by radio stimulation in monkey colonies, 669.
Agonistic behavior of mice and rats: a review, 683.
American Society of Zoologists,
  Committees, 2.
  Divisional Officers, 2.
  Financial Statement, 7.
  Minutes, 3.
  Notices, 5.
  Officers for 1966, 2.
  Presidential address, Clifford Grobstein, 621.
  Program of meetings, 63rd annual, 471.
    Summer, 275.
American Zoologist,
  Directions for authors, 1.
  Editorial board, 2.
  Subscriptions, 1.
  Statement of ownership, 1.

BAIRD, IRWIN L., Discussion of the reptilian ear, 431.
BELAMARICH, FRANK A., and ROBERT TERWILLIGER, Isolation and identification of cardio-excitor hormone from the pericardial organs of *Cancer borealis*, 101.
BERN, HOWARD A., (with LEONARD SIMPSON and RICHARD NISHIOKA), Survey of evidence for neurosecretion in gastropod molluscs, 123.
Betta splendens, aggressive behavior in, 629.
BLISS, DOROTHY E., Relation between reproduction and growth in decapod crustaceans, 231.
  Water balance in the land crab, *Gecarcinus lateralis*, during the intermolt cycle, 197.
BROWN, FRANK A., JR., Cyclic physiological processes and neurosecretion, 159.

Cardiac ganglia, lobster, 110.
Cells, movement of, 11.
CHAET, ALFRED B., The gamete-shedding substances of starfishes: a physiological-biochemical study, 263.
Chromatophores, crab, 170.
CLEVER, ULRICH, Gene activity patterns and cellular differentiation, 33.
Cochlear duct, in lizards and snakes, 421.
Competition, as a cause of aggression, 696.
Control, environmental, 17.
  of tissues specificity, 21.
COOKE, IAN M., The sites of action of pericardial organ extract and 5-hydroxytryptamine in the decapod crustacean heart, 107.
COSTLOW, JOHN D., (with FREDERICK A. KALBER, JR.), The ontogeny of osmoregulation and its neurosecretory control in the decapod crustacean, *Rhithropanopeus harrisii* (Gould), 221.

DAVEY, K. G., Neurosecretion and molting in some parasitic nematodes, 243.
DELGADO, JOSÉ M. R., Aggressive behavior evoked by radio stimulation in monkey colonies, 669.
DENISON, ROBERT H., The origin of the lateral-line sensory system, 369.
Development, problems and principles of, 9.
Developmental centers, 16.
Differentiation, unknowns of, 89.
Dominance, 16, 687.

Ear, external, 451.
  inner, 454.
  mammalian, 451.
  middle, 452.
  structure and functions, 451.
Editor's notes, 6, 8, 368, 705.
Egg, organization of, 9.

FINGERMAN, MILTON, Neurosecretory control of pigmentary effectors in crustaceans, 169.
FOWLER, DONA J., and CLARENCE J. GOODNIGHT, The cyclic production of 5-hydroxytryptamine in in the opilionid, 187.

Gametes, shedding of, starfish, 263.
Genes, activity patterns of, 33.
  in development, 35.
  control, 37.
GOODNIGHT, CLARENCE J., (with DONA J. FOWLER), on neurosecretion of invertebrates other than insects, 99.
GOODNIGHT, CLARENCE J., (with DONA J. FOWLER), The cyclic production of 5-hydroxytryptamine in the opilionid, 187.
Gradients and fields, 15.
GROBSTEIN, CLIFFORD, New patterns in the organization of biology, 621.
  What we do not know about differentiation, 89.

Growth, differential, 12, 15.
macromolecular changes associated with, in crustaceans, 235.
of tissues, crab, 237.
relation to reproduction, crustaceans, 231.

HAGADORN, IRVINE R., Neurosecretion in the Hirudinea and its possible role in reproduction, 251.
Hearing, evolution of, 371.
aerial, 391.
Hemoglobin, synthesis of, 71.
Heredity, and agonistic behavior, 692.
HOPSON, JAMES A., The origin of the mammalian middle ear, 437.
Hormone, cardio-excitor of crab, 101.
diabetogenic, 165.
eyestalk, separation and purification, 161.
molt-inhibiting, 164.
pigmentary-effector, 164, 169.
5-Hydroxytryptamine, sites of action, lobster, 107.

Induction, 18.
Integration, 16.

Jelly-coats, function in fertilization, 82.
immunobiological experiments with, 78.
interactions with sperm, 77.
of anuran eggs, 75.
physical and chemical composition of, 75.
precipitation by homologous antisera, 79.
production by oviduct, 81.
species-specific components of, 82.

KALBER, FREDERICK A., JR., and JOHN D. COSTLOW, The ontogeny of osmoregulation and its neurosecretory control in the decapod crustacean, *Rhithropanopeus harrisii* (Gould), 221.

NOTICES

THE AMERICAN ZOOLOGIST ON MICROFILM

Copies of individual articles from the *American Zoologist* are now available on microfilm from University Microfilms, Inc., 300 N. Zeeb Road, Ann Arbor, Michigan, 48106. Whole volumes on microfilm may be obtained after the present inventory of printed copies is gone.

SUMMER INSTITUTES

Histochemistry: For the third year, a short course in histochemistry will be offered by the Department of General Biology, Vanderbilt University, from July 30 to August 19, 1967. Living and travel expenses for twenty selected participants will be supported by a grant from the National Science Foundation. No tuition or fees will be charged. To be eligible, applicants must be members of the faculty of an accredited college or university and teach at least one course in some area of zoology. In addition, they must be interested either in teaching or research in histochemistry. Specialists in the various areas of histochemistry will lecture and conduct demonstrations. Application forms may be obtained from Burton J. Bogitsh, Box 1733, Station B, Vanderbilt University, Nashville, Tennessee 37203. Deadline for receipt, May 1, 1967.

The Organism: Its Development, Behavior, and Ecology: A summer institute for teachers of biology in junior and 4-year colleges will be held at Williams College from June 26 to August 5, 1967. Fifty participants will study three areas of biology which show every prospect of increasing vigor in the future, namely: Development, Behavior, and Ecology. Programs of lecture, discussion, and laboratory will be presented by a staff of fourteen biologists, together with several guest lecturers. Participants will be selected solely on the basis of their ability to benefit from the program. The institute will be supported by a grant from the National Science Foundation. No tuition or fees will be charged, nor any credit or degree given. Information and application forms may be obtained from Allyn J. Waterman, Department of Biology, Williams College, Williamstown, Mass. 01267. All applications postmarked by February 15, 1967, will be considered together, later ones individually.
